ScytI strongly denies the false information related to the U.S. elections

November 13, 2020 | General

In view of the information published by some sources about ScytI's involvement in alleged electoral fraud in United States, the company would like to clarify that:

1) ScytI has NO presence in Frankfurt, Germany

- The U.S. military has not seized anything related to ScytI in Frankfurt, Barcelona or anywhere else. The company does not even have offices in Frankfurt and does not have servers or computers in the German city.
- Servers in Frankfurt were used for a specific project for the European Parliament in 2019. These back-up servers were closed in September 2019.
- The technologies implemented by ScytI in the United States are hosted and managed within the United States by our local subsidiary, SOE Software, based in Tampa, Florida.
- The company currently has offices in: Spain, France, Greece, the US, Canada, and Australia.
- Associated Press published on November 14 an article debunking the fake news.

2) ScytI did NOT provide any electronic voting machines to US jurisdictions and does NOT tabulate, tally or count votes in US public elections.

These are the products ScytI provided to city, county, and state clients across the United States:

- **Election Night Reporting (ENR):** ENR is a platform that provides visual representation of votes that have been tabulated by state and local elections officials.
- **Online Election Worker Training:** ScytI works with election offices to take their already-created training content and put it into an online learning management system. All of the content for this training is...

These are the products Scytl provided to city, county, and state clients across the United States:

- **Election Night Reporting (ENR):** ENR is a platform that provides visual representation of votes that have been tabulated by state and local elections officials.
- **Online Election Worker Training:** Scytl works with election offices to take their already-created training content and put it into an online learning management system. All of the content for this training is provided and fully approved by each individual client.
- **Online Voter Education:** A website for election officials to provide important election information to voters before, during, and after an election. All content on these websites is provided and approved by each individual client.
- **Electronic Ballot Delivery (eBD):** A platform that allows state election offices to securely deliver ballots to UOCAVA voters. Each state has different laws and regulations regarding who can request a ballot through this system, and how that ballot can be returned. eBD does NOT allow voters to vote online and does NOT tabulate, tally, or count votes.

3) Scytl has NO political affiliation

- Scytl has no political affiliations of any kind. Scytl has corporate policies prohibiting direct or indirect financial contributions by the company or its employees to candidates, political parties or PACs (political action committees).
- George Soros has no stake in the company and has never been connected to it.
- Scytl has no relationship with Smartmatic, SGO, Dominion or Indra.
- Scytl is not connected in any way with the Russian Government.

4) US Elections are safe and secure:

Scytl has not reported any incidents during the election. In addition, the Cybersecurity & Infrastructure Security Agency (CISA) of the U.S. Department of Homeland Security have revealed that:

- The tabulation processes are protected by various safeguards that help ensure the accuracy of election results.
- The November 3rd elections was the most secure election in the history of the United States.
